Kills 99.9% Germs

Description

Disinfects on hard, non-porous surfaces and soft spot surface sanitizer applications. For non-food application use on: High touch surfaces, door knobs, light switches, toilets, sinks, bathtubs, showers, kitchen appliance surfaces, garbage cans. Disinfects food contact surfaces such as tables, counter tops, appliances, and toys in Kitchens, Restaurants, Commercial Establishments and Homes. Sanitizes soft non-food contact surfaces as a spot treatment.

Directions

To Disinfect and for Tuberculocidal Activity:

- 1 After hard, non-porous surface is cleaned, hold can upright 6" to 8" from area to be treated.
- 2 Spray until surface is thoroughly wet.
- 3 Allow to dry without wiping or allow spray to contact treated surface for a minimum of 3 minutes prior to wiping.
- 4 Reapplication is necessary if surface is dried before contact time is achieved.
- 5 When used on toys or food contact surfaces such as countertops, tables and appliances, thoroughly rinse surfaces with potable water before use.
- 6 Do not use on utensils, dishes or glasses.
