Fresh Traction Wash

Features:

- Single Use Packet**
- Continuous Cleaning When Damp**
- Improves Slip Resistance**
- One Step Cleaning and Deodorizing**

Description

This product is a 2 in 1 cleaner and fresh digester providing odor and soil free floors and grout. Kitchen floors require special attention due to the types of soil they are exposed to. Animal fats and vegetable oils along with the normal tracked-in dirt cause kitchen floors, especially those with mortar grout, to become slippery and hard to clean. This product does it all — a heavy duty cleaner with a neutral pH, incorporating enzymes to clean the floor and eliminate unpleasant odors, improving slip resistance for worry-free floors.

Directions

For quarry tile, concrete, brick, and rubber mats:

- 1 Sweep floors.
- 2 Mix contents of both packets into 3 - 4 gallons of mop water.
- 3 Mop thoroughly, rinsing mop in cleaning solution frequently.
- 4 Mop excess liquid into floor drain, or remove with a mop or squeegee.
- 5 Pour used mop water into floor drain to help reduce grease build-up and odors.

Fresh Traction Wash has been tested for slip resistance through the ASTM C1028 test and shows to be comparable to the Ecolab Wash 'n Walk product.

Applications

For cleaning greasy floors in:

- > Kitchens
- > Restaurants and cafeterias
- > Other food processing areas

Specifications

Color Green (when mixed)
