

Revamp Quarry Tile Cleaner & Restorer

FOOD SERVICE

DESCRIPTION

This concentrated blend of mild acidic detergents, wetting agents, soil suspenders and water conditioners is used to clean and prevent slip hazards on quarry tile, cement and concrete floors. It removes grease, grime, soap scum, and mineral accumulation often found on quarry tile. This cleaner improves traction by penetrating porous surfaces to provide a deep clean.

APPLICATIONS

Liquid Clenser and Restorer for:

- Acid resistant surfaces only
- Quarry Tile, Cement, and Concrete

FEATURES

- Mild Acid Detergent
- Restores Slip Resistance
- Emusifies Greasy Soils

DIRECTIONS

FOR USE ON ACID RESISTANT SURFACES ONLY. DO NOT USE ON POLISHED MARBLE, TERRAZZO, ALUMINUM OR ALUMINUM ALLOYS.

Please read all instructions and precautionary statements before using. Floor may become very slippery during cleaning operation due to suspended grease and oil being lifted to the top of the floor. Do not allow cleaner to remain on painted wood, aluminum, nylon or polished marble. May have a bleaching effect on some floors. Testing on a small inconspicuous area of floor prior to use is highly recommended.

Dilute with warm or cold water to the concentration that best suits the job as follows:

For initial application, dilute as needed to achieve desired result. For routine maintenance, use 3 oz. of product per gallon of water. Apply evenly with deck brush, broom or mop. Once applied, scrub with a deck brush. Allow to remain for 5 to 10 minutes before removing residue with squeegee. Rinse thoroughly and dry with squeegee or clean dry mop.

SPECIFICATIONS

Color..... Red
 Fragrance..... None
 pH Range..... 1.0 - 1.5

Dilution RTU or 3oz./gal.
 Density 8.59

FS1716-414/1 gal.
